### About the herd

The Bihl Bros. herd of Wheelersburg, Ohio was started in 1947 by Charles and Louis Bihl. It has been maintained as a purebred breeding herd since, by using good herd bulls and only keeping the top females to put back in the herd. Almost all the bull calves were steered and put with the cull heifers in the feedlot and demanded premium prices when finished out. The cattle management was handled by Louis, with Charles managing the other farm businesses. A good herd bull was always number one priority in the herd, always going to one of the top herds and selecting one of their best bulls for the herd bull. Most notable were; Barony's Scotsman 35th from Hanson in Indiana, Sutherland Defiance and Sutherland Custodian from Kentucky, Greenland Ransom 2nd from Pen-Y-Bryn in Virginia, of which their is still twenty daughters in the herd, Four Dees Earl from Illinois, who is still in use and has thirty daughters selling not counting the 1977 calves. After the death of Louis in 1970, Charles took over management of the herd. There has been no showing or promoting since then, but the herd has maintained it's high quality. A two month bout in the hospital this spring has left Charles unable to care for the cattle and with the farm labor also unable, the decision of this dispersal had to be made. As with any dispersal, it was a hard decision to make, when you've put 30 years of your life into something, it's very hard to part with. But the decision has been made and the most enjoyable part of it would be to see these cattle go out into their new herds and be as successful and enjoyable for their new owners as they have been for us.

We have attempted to list the females here by cow families. Therefore there has been no attempt to list them by quality or age. Although no breeding dates are kept, the cows are regular producers and should keep producing at regular intervals. The cows with spring calves at side have been exposed to the bulls since June 10. The cows to calve this fall calved last fall and were exposed to the bulls through the winter months. Any cow that has not produced a calf at regular intervals for the last two years has been pregnancy examined by the vet and pronounced safe. Those not with calf or not healthy enough to sell have been disposed of as slaughter cattle. So the quality of cattle runs throughout the listing and any more pertinent information gained will be announced at sale time. The entire breeding herd sells, nothing will be held back for any reason. Therefore the selection is great; for breeding cow replacements or additions, herd bull prospects, several excellent club steer prospects, show heifers, or starting new herds. We feel that you can buy with confidence in these cattle, as we have confidence in them.
